

# WAR ON NATURE IN THE BAY AREA

*your tax dollar\$ at work—  
half a million trees at risk*

FEMA, the federal agency funding the death of our large healthy forest trees, plans to transform the land into flammable “grassland with islands of shrubs.” A total 105 forests in various locations of the Bay Area will be eliminated on public lands.

*Starting in August 2015 trees in the East Bay hills will be clear cut and thousands of gallons of Monsanto and Dow poisons will be dumped on their freshly razed stumps. Costing nearly \$6 million, this plan will radically transform the healthy recreational access, character and appearance of the hills, cause great animal suffering, and the decimation of habitats vital to all species. Animals will be displaced or forced to live in toxic sites that poison them, their food and their water supply. All of us in the Bay Area will be exposed to hazardous chemicals while we mourn the loss of our beneficial healthy forests.*

**SPEAK FOR THE TREES! Join Bay Area citizens in fighting the FEMA-funded destruction and poisoning of our Bay Area public parks and forests.**

Visit these organizations' websites to learn what you can do to prevent this pointless destruction.
